Death of the children due to insantta-tion and unsafe drinking water

265. SHRI MOSTAFA BIN QUASEM: Will the [Minister of HEALTH AND FAMILy WELFARE be pleased to state;

(a) whether Government are aware that about 1. 5 million children, below the age of Ave years die every year in the country due to poor sanitation and unsafe drinking water;

(b) if so. the reaction of Government thereto;

(c) whether there is any proposal to reduce the number of such deaths by improving the sanitation and providing safe drinking water to the rural public;

(d) if so, the details thereof; and

(e) the steps so far taken in this regard?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (KUMARI SAROJ KHAPARDE); (a) There is no precise estimate of number of children below 5 years of age dying every year due to poor sanitation and unsafe drinking water. However, acute diar-rhoeal diseases such as cholera, gas--tro-enteritis, dysentary and infectious hepatitis are mostly attributable to unsafe drinking water supply, poor environmental sanitation and P°or personal and food hygiene. Among the diarrhoeal diseases, only cholera is a notifiable disease. Deaths due to Cholera, Gastro-enteritis, Dysentery and Infectious Hepatitis as compiled by Central Bureau of Health Intelligence during 198Y in the country, are shown below:

	Deaths
Cholera	224
D/^atery	1441
Gastro- enteritis	3388
Infectious Hepatitis	1380
